1177 BC: The Year 8 Empires Collapsed at Once

Week 2 Modular 5-Part Production Master • 100% Causal Synced • 5 Standalone Shorts • Era-Locked Fooocus Prompts

This production blueprint implements the **Modular 5-Part Storytelling Architecture** for Week 2 of Chronos Shift (@ChronosShiftHistory). Each of the 5 parts is written as a complete, high-retention causal story beat with its own 2-second hook. When exported individually, each part functions as an elite 9:16 vertical Short (Monday through Friday). When concatenated sequentially, they form the seamless 16:9 master documentary (9 minutes, 58 cuts) scheduled for Friday at 18:00 IST.

Packaging & High-CTR Title Matrix

Deliverable	Title & Hook Packaging (Underdog Asymmetry)	Target Release Slot & Funnel Link
16:9 Master Documentary	**Primary:** 1177 BC: The Year 8 Empires Collapsed at Once **Alt A/B:** How Civilization Reset in 1177 BC: The Mystery of the Sea Peoples	**Friday 18:00 IST** Mid-roll ad placements at 0:00, 2:45, 5:30, 7:15
Short 1 (Part 1)	**The Unsent Clay Letter Baked by a Burning Empire (1177 BC)** *Hook: Archaeologists found a royal letter baked hard by palace flames.*	**Monday 13:00 IST** • Related Video: Master Doc
Short 2 (Part 2)	**Why 8 Ancient Superpowers Depended on One Single Ship** *Hook: 8 rival empires were locked into one 9-to-1 metal trade lifeline.*	**Tuesday 13:00 IST** • Related Video: Master Doc
Short 3 (Part 3)	**The 300-Year Drought That Toppled Bronze Age Fortresses** *Hook: The collapse didn't start with enemy armies—it started from the sky.*	**Wednesday 13:00 IST** • Related Video: Master Doc
Short 4 (Part 4)	**Who Were the Mysterious Sea Peoples of 1177 BC?** *Hook: Temple walls reveal ox-carts carrying families—an armed migration.*	**Thursday 13:00 IST** • Related Video: Master Doc
Short 5 (Part 5)	**How Egypt Trapped the Sea Peoples and Ignited the Iron Age** *Hook: Only 1 empire survived out of 8 by setting a deadly river trap.*	**Friday 13:00 IST** • Related Video: Master Doc

Standalone YouTube Shorts Scripts (Parts 1 to 5)

Short ID & Day	Title & Hook Sentence	Spoken Script (MarginV=620 Safe-Zone Karaoke Subtitles)
w2_short_01 Monday 13:00 IST	**The Unsent Clay Letter Baked by a Burning Empire (1177 BC)** *Hook: In the ashes of a destroyed palace, archaeologists found a clay letter that was never delivered—it was baked hard by the palace flames.*	In the ashes of a destroyed Syrian palace, archaeologists found a clay letter that was never delivered—it was baked hard by the flames of the burning palace itself. King Ammurapi of Ugarit wrote: 'My father, behold, the enemy ships came. My cities were burned, and they did evil things in my country.' Because his entire army was fighting far away, the city was defenseless. Forty-eight hours later, the palace fell, and a six-foot layer of ash buried the city for three thousand years. Watch the full documentary on Chronos Shift to see why eight empires collapsed at once.
w2_short_02 Tuesday 13:00 IST	**Why 8 Ancient Superpowers Depended on One Single Ship** *Hook: In 1200 BC, eight rival empires were connected by one single military metal: bronze. And there was a fatal catch.*	In 1200 BC, eight rival superpowers—including Egypt, Greece, and Troy—depended on a single military metal: bronze. To make bronze, kings needed nine parts copper and one part tin. Copper came from Cyprus, but the only tin mines were three thousand miles away in the mountains of Afghanistan. When divers found the sunken Uluburun shipwreck off Turkey, it carried ten tons of copper and one ton of tin—the exact ratio to equip an entire army. Because every empire was locked into this single trade lifeline, if the ships stopped, the entire ancient world went unarmed. Watch the full documentary on Chronos Shift.
w2_short_03 Wednesday 13:00 IST	**The 300-Year Drought That Toppled Bronze Age Fortresses** *Hook: The Bronze Age collapse didn't start with enemy armies—it started from the sky.*	The Bronze Age collapse didn't start with enemy armies—it started from the sky. Fossil pollen cores drilled from the Dead Sea prove that around 1200 BC, a 300-year mega-drought hit the Mediterranean. Winter rains vanished, rivers dried up, and kings begged each other for grain. Then, the ground broke: geologists found an earthquake storm that cracked the fortress walls of Mycenae and Troy before any enemy arrived. With empty grain silos and shattered walls, starving populations took their weapons and took to the sea. Watch the full story on Chronos Shift.
w2_short_04 Thursday 13:00 IST	**Who Were the Mysterious Sea Peoples of 1177 BC?** *Hook: They toppled the Hittites, burned Mycenae, and erased Ugarit—yet the temple walls reveal a chilling truth.*	They toppled the Hittite Empire, burned Mycenae, and erased Ugarit—yet the temple walls at Medinet Habu reveal a chilling truth. Look closely at the Egyptian carvings: behind the warriors in horned helmets and bronze slashing swords roll wooden ox-carts carrying women, children, and livestock. This wasn't a pirate raid—it was an armed migration of starving nations. No land could stand before them, and by 1177 BC, only one empire was left standing: Egypt. Watch the full documentary on Chronos Shift.

Short ID & Day	Title & Hook Sentence	Spoken Script (MarginV=620 Safe-Zone Karaoke Subtitles)
w2_short_05 Friday 13:00 IST	**How Egypt Trapped the Sea Peoples and Ignited the Iron Age** *Hook: By 1177 BC, every empire had fallen except Egypt. So Pharaoh Ramesses III set a deadly trap in the Nile.*	By 1177 BC, every empire in the Mediterranean had fallen except Egypt. Knowing he couldn't defeat the Sea Peoples on the open sea, Pharaoh Ramesses the Third lured their armada into the narrow mud channels of the Nile Delta. Egyptian warships sealed the river mouth behind them, while thousands of archers opened fire from both banks, crushing the invasion. But the bronze trade was gone forever, forcing blacksmiths to forge a metal under their feet: iron. Watch the full documentary on Chronos Shift to see how the modern world was born.

Part 1 (Short 1): The Unsent Clay Letter Baked by a Burning Empire (1177 BC)

Long-Form Act Title: The Unsent Clay Letter of Ugarit • **Word Count:** 203 words • **Visual Cuts:** 12 shots (averaging 3.5s per cut) • **Format:** Plays as Act 1 in the Master 16:9 Documentary AND exports as a standalone 9:16 Short.

Cut ID & Type	Spoken Narration (ChristopherNeural +8%)	Era-Locked Fooocus SDXL Prompt (3–4s Cut)
act01_shot01 Macro Detail (push_in)	In the ruins of a burned Syrian palace, archaeologists found a clay letter that was never delivered.	16:9 cinematic macro close-up of a cracked ancient clay cuneiform tablet resting in black char and embers on a ruined palace stone floor, flickering torchlight, photorealistic 8k, historical authenticity 1177 BC
act01_shot02 Macro Detail (pull_out)	It was never baked in a kiln. Instead, it was baked rock-hard by the flames of the burning palace itself.	16:9 dramatic close-up of ancient cuneiform clay tablet surrounded by glowing orange fire and collapsing wooden beams, intense heat ripples, 8k
act01_shot03 Medium Troop (push_in)	The message was from King Ammurapi of Ugarit, desperately begging the island of Cyprus for help.	16:9 medium shot of Bronze Age King Ammurapi in gold-fringed linen robes and bronze crown frantically dictating to a scribe in a stone throne room at night, 8k
act01_shot04 Primary Source (push_in)	He wrote: 'My father, behold, the enemy ships came. My cities were burned, and they did evil things in my country.'	16:9 archival primary source parchment callout of Ugarit tablet RS 20.238 with glowing amber cuneiform translation highlights, warm candlelight
act01_shot05 Tactical Map (pan_right)	Because his entire army was away fighting in Anatolia, his kingdom was completely defenseless.	16:9 top-down illustrated tactical parchment map of Syria, Anatolia, and Cyprus showing Ugarit's army marching far north while enemy naval fleets approach the empty coast

Cut ID & Type	Spoken Narration (ChristopherNeural +8%)	Era-Locked Fooocus SDXL Prompt (3–4s Cut)
act01_shot06 Medium Troop (push_in)	Within forty-eight hours of those words being pressed into the clay, enemy warriors stormed the harbor.	16:9 action shot of Bronze Age warriors with round shields and bronze slashing swords leaping from beached wooden warships onto a stone harbor quay under dark clouds, 8k
act01_shot07 Wide Establishing (pull_out)	They put the royal palace and the great temples to the torch.	16:9 wide shot of the monumental limestone palace of Ugarit engulfed in roaring orange flames at midnight, smoke billowing over the sea, 8k
act01_shot08 Macro Detail (pan_left_up)	Ugarit was burned so violently that a six-foot layer of ash buried the city for three thousand years.	16:9 cinematic cross-section shot of modern archaeological excavation trench showing a thick two-meter black ash layer filled with bronze arrowheads and broken pottery, 8k
act01_shot09 Wide Establishing (push_in)	And Ugarit was not alone. In that exact same generation, eight of the greatest empires on Earth vanished.	16:9 panoramic view of ancient ruins stretching along the Mediterranean coast at sunset, toppled stone pillars, dark ominous sky, 8k
act01_shot010 Tactical Map (pan_right)	The mighty Hittites in Turkey, the citadel-kings of Mycenae in Greece, the kingdoms of Canaan—all collapsed in fire.	16:9 wide tactical map of the Eastern Mediterranean in 1177 BC showing red flame markers simultaneously consuming Mycenae, Troy, Hattusa, Ugarit, and Megiddo
act01_shot011 Macro Detail (push_in)	Why did the entire civilized world end in 1177 BC? Because every king depended on one single metal: bronze.	16:9 glowing macro close-up of molten golden bronze pouring from an ancient clay crucible into stone sword molds, sparks illuminating dark stone walls, 8k
act01_shot012 Wide Establishing (pull_out)	Watch how a single broken trade ship caused the greatest reset in human history.	16:9 dramatic cinematic shot of a single Bronze Age wooden merchant galley sailing into gathering black storm clouds on the open Mediterranean, 8k

Part 2 (Short 2): Why 8 Ancient Superpowers Depended on One Single Ship

Long-Form Act Title: The 9-to-1 Metal Lifeline: Why 8 Empires Depended on One Ship • **Word Count:** 197 words • **Visual Cuts:** 12 shots (averaging 3.5s per cut) • **Format:** Plays as Act 2 in the Master 16:9 Documentary AND exports as a standalone 9:16 Short.

Cut ID & Type	Spoken Narration (ChristopherNeural +8%)	Era-Locked Fooocus SDXL Prompt (3–4s Cut)
act02_shot01 Wide Establishing (push_in)	In 1200 BC, eight rival empires were connected by the first globalized trade network in history.	16:9 epic wide establishing shot of a bustling Bronze Age stone harbor with merchant galleys, stone quays stacked with pottery amphorae, and traders in linen robes, photorealistic 8k
act02_shot02 Tactical Map (pan_right)	Egypt, Babylon, the Hittites, and Greece didn't just trade silk and gold—they traded military survival.	16:9 high-contrast illustrated map of the Mediterranean connecting Mycenae, Hattusa, Babylon, and Egyptian Thebes with golden glowing trade routes
act02_shot03 Macro Detail (push_in)	Every sword, spear, chariot axle, and shield in the ancient world was forged from bronze.	16:9 macro close-up of a bronze Mycenaean spearhead and Naue II sword gleaming in the sun, fine hammered metal texture, 8k
act02_shot04 Macro Detail (pull_out)	To make bronze, you need nine parts copper and one part tin. And there was a fatal catch.	16:9 laboratory macro shot of raw green malachite copper ore next to dull grey cassiterite tin stones resting on a leather merchant scale, 8k
act02_shot05 Wide Establishing (pan_right)	Copper was easy—it was mined on the island of Cyprus. But tin was almost impossible to find.	16:9 wide aerial landscape shot of the ancient open-cast copper mines of Cyprus with miners hauling baskets of green ore under a blazing sun, 8k
act02_shot06 Wide Establishing (push_in)	The only major tin mines were in the mountains of Afghanistan, over three thousand miles away.	16:9 rugged cinematic landscape of a donkey caravan trudging along a narrow mountain pass in the Hindu Kush mountains of Afghanistan, laden with raw tin sacks, 8k
act02_shot07 Medium Troop (pan_right)	Donkey caravans had to haul the tin across deserts and mountains for months just to reach Mediterranean ports.	16:9 medium shot of Bronze Age merchants in dusty wool cloaks leading heavily laden pack animals across dry desert riverbeds at dusk, 8k
act02_shot08 Wide Establishing (pull_out)	When divers excavated the sunken Uluburun shipwreck off Turkey, they found the entire world on a single hull.	16:9 underwater archaeology cinematic shot of a 3,300-year-old wooden ship hull resting on sandy Mediterranean seabed with divers inspecting stacks of oxhide copper ingots, 8k
act02_shot09 Macro Detail (push_in)	The ship carried ten tons of Cypriot copper ingots and one ton of Afghan tin—the exact 9-to-1 ratio to equip an entire army.	16:9 macro close-up of stacked four-handled oxhide bronze and copper ingots stamped with ancient maker marks, barnacles, 8k
act02_shot010 Macro Detail (pull_out)	Alongside the metals were Egyptian gold scarabs, Baltic amber, and Mesopotamian glass.	16:9 macro flat-lay shot of golden Egyptian royal scarab amulet, blue glass discs, and golden Baltic amber beads on aged vellum, 8k

Cut ID & Type	Spoken Narration (ChristopherNeural +8%)	Era-Locked Fooocus SDXL Prompt (3–4s Cut)
act02_shot011 Tactical Map (push_in)	Because every empire was locked into this single supply chain, if the tin ships stopped, the entire world would go unarmed.	16:9 animated trade route lifeline map showing trade lanes blinking and snapping one by one across the Mediterranean basin
act02_shot012 Wide Establishing (pull_out)	And then, nature struck the first devastating blow.	16:9 ominous wide shot of a blood-red sun setting behind cracked desert earth as hot wind whips dust across dying farmland, 8k

Part 3 (Short 3): The 300-Year Drought That Toppled Bronze Age Fortresses

Long-Form Act Title: The Four Horsemen: 300-Year Drought and Earthquake Storm • **Word Count:** 193 words • **Visual Cuts:** 12 shots (averaging 3.5s per cut) • **Format:** Plays as Act 3 in the Master 16:9 Documentary AND exports as a standalone 9:16 Short.

Cut ID & Type	Spoken Narration (ChristopherNeural +8%)	Era-Locked Fooocus SDXL Prompt (3–4s Cut)
act03_shot01 Wide Establishing (push_in)	The collapse didn't start with enemy armies. It started from the sky.	16:9 dramatic cinematic shot of a vast dry Anatolian plain with deep fissure cracks in the soil under a blazing white sun, heat haze, 8k
act03_shot02 Macro Detail (pull_out)	Fossil pollen cores drilled from the Dead Sea prove that around 1200 BC, a 300-year mega-drought hit the Mediterranean.	16:9 scientific documentary shot showing an archaeological sediment pollen core tube held by researchers with fossilized micro-layers labeled, 8k
act03_shot03 Wide Establishing (pan_right)	Winter rains completely vanished from Greece to Anatolia, turning lush wheat fields into dust bowls.	16:9 wide shot of withered, dead wheat stalks on parched farmland, cattle skeletons half-buried in dry dirt, ruined farmhouses, 8k
act03_shot04 Medium Troop (push_in)	In the royal archives of the Hittite capital, clay tablets show kings panicking over empty grain silos.	16:9 medium shot of Hittite royal scribes inspecting empty clay storage jars in a cavernous stone palace cellar, dust and cobwebs, 8k
act03_shot05 Primary Source (push_in)	A royal letter from the Hittite king pleaded: 'Do you not know that there is famine in my land? It is a matter of life and death!'	16:9 archival primary source callout of Hittite royal tablet RS 20.212 with highlighted translation text of the famine plea, 8k
act03_shot06 Wide Establishing (pan_right)	Pharaoh Merneptah of Egypt sent emergency grain ships across the sea to keep his starving allies alive.	16:9 wide shot of Egyptian reed-and-wood cargo ships loaded high with grain sacks sailing across the Nile river toward the Mediterranean coast, 8k

Cut ID & Type	Spoken Narration (ChristopherNeural +8%)	Era-Locked Fooocus SDXL Prompt (3–4s Cut)
act03_shot07 Action (push_in)	Then, the ground itself broke.	16:9 terrifying low-angle shot of a massive cyclopean stone fortress wall at Mycenae violently shaking and splitting open with stone dust spraying out, 8k
act03_shot08 Tactical Map (push_in)	Geologists discovered an 'earthquake storm'—a series of massive tremors that struck along fault lines for fifty years.	16:9 seismic fault map of the Aegean and Levant showing active red fault lines unzipping through Mycenae, Tiryns, Troy, and Ugarit
act03_shot09 Wide Establishing (pull_out)	The fortress walls of Mycenae, Tiryns, and Troy VI were cracked and toppled by nature before any enemy arrived.	16:9 wide shot of the collapsed stone Lion Gate of Mycenae with massive limestone lintels shattered on the ground amid smoke and dust, 8k
act03_shot010 Medium Troop (push_in)	With their cities broken and their grain stores empty, millions of starving people were pushed to the edge.	16:9 atmospheric medium shot of desperate Bronze Age families in rough woolen tunics huddled outside crumbling city gates holding empty bowls, 8k
act03_shot011 Wide Establishing (pan_right)	And when a civilization starves, it does not die quietly—it takes its weapons and moves.	16:9 dramatic silhouette shot of hundreds of warriors carrying round shields and spears marching in long lines along coastal cliffs at sunset, 8k
act03_shot012 Wide Establishing (pull_out)	Out of the sea came an armada the world had never seen.	16:9 ominous dawn shot looking out from a rocky Mediterranean promontory at hundreds of wooden war galleys with bird-head prows emerging from thick fog, 8k

Part 4 (Short 4): Who Were the Mysterious Sea Peoples of 1177 BC?

Long-Form Act Title: The Armed Migration: Who Were the Sea Peoples? • **Word Count:** 174 words • **Visual Cuts:** 11 shots (averaging 3.5s per cut) • **Format:** Plays as Act 4 in the Master 16:9 Documentary AND exports as a standalone 9:16 Short.

Cut ID & Type	Spoken Narration (ChristopherNeural +8%)	Era-Locked Fooocus SDXL Prompt (3–4s Cut)
act04_shot01 Primary Source (push_in)	Egyptian temple walls call them the 'Nine Bows of the Sea'—known to history as the Sea Peoples.	16:9 high-contrast macro shot of ancient carved limestone hieroglyphic reliefs at Medinet Habu temple showing foreign warriors with feathered crowns and horned helmets, 8k

Cut ID & Type	Spoken Narration (ChristopherNeural +8%)	Era-Locked Fooocus SDXL Prompt (3–4s Cut)
act04_shot02 Primary Source (pull_out)	For centuries, historians thought they were just ruthless pirate raiders. But the temple carvings show a darker truth.	16:9 close-up relief carving of a heavy two-wheeled wooden ox-cart carrying women, children, and woven baskets guarded by warriors with round shields, 8k
act04_shot03 Medium Troop (pan_right)	Behind the warriors in horned helmets roll wooden ox-carts carrying women, children, and livestock. This was an armed migration.	16:9 cinematic medium shot of a gritty Bronze Age migrant convoy on a dusty Mediterranean coastal track: warriors marching alongside wooden carts carrying families and supplies, 8k
act04_shot04 Macro Detail (push_in)	They were armed with long, straight bronze slashing swords that shattered traditional Bronze Age chariot warfare.	16:9 macro close-up of a fearsome bronze Naue Type II flange-hilted slashing sword in the grip of a battle-hardened warrior wearing a horned bronze helmet, 8k
act04_shot05 Medium Troop (push_in)	Every city they conquered was stripped for food, and desperate survivors were forced into their ranks.	16:9 action shot of Sea Peoples warriors breaking through wooden gates of a burning coastal walled town, carrying grain sacks and weapons, 8k
act04_shot06 Primary Source (pull_out)	At Pylos in Greece, royal scribes frantically etched clay tablets ordering temple bronze to be melted down for spearheads.	16:9 macro shot of a Pylos Linear B clay tablet being hurriedly incised with a bone stylus, bronze vessels piled on a table beside it, 8k
act04_shot07 Wide Establishing (pull_out)	Days later, Pylos was burned so hot that its clay walls turned into glass.	16:9 wide shot of the palace of Pylos in flames at night, fiery sparks raining down on stone courtyards, smoke rising into the starry sky, 8k
act04_shot08 Primary Source (push_in)	Pharaoh Ramesses the Third recorded the terrifying domino collapse: 'No land could stand before their arms.'	16:9 archival stone callout of Medinet Habu Year 8 inscription with translated hieroglyphic text declaring the destruction of Hatti, Carchemish, and Alashiya
act04_shot09 Tactical Map (pan_right)	The Hittite Empire in Turkey, the cities of Cyprus, and the ports of Canaan were wiped out one by one.	16:9 tactical campaign map showing rapid red assault arrows converging from the sea into Anatolia, the Levant, and Cyprus, crushing defensive capitals
act04_shot010 Wide Establishing (push_in)	By 1177 BC, only one superpower was left standing: Egypt.	16:9 grand wide shot of the monumental stone pylons of Karnak Temple in Luxor under an intense golden sun, Egyptian standards fluttering in the wind, 8k

Cut ID & Type	Spoken Narration (ChristopherNeural +8%)	Era-Locked Fooocus SDXL Prompt (3–4s Cut)
act04_shot011 Wide Establishing (pull_out)	And the invaders were coming straight for the Nile.	16:9 dramatic sunset view looking down the wide blue Nile river toward the sea as distant war fleets appear on the horizon, 8k

Part 5 (Short 5): How Egypt Trapped the Sea Peoples and Ignited the Iron Age

Long-Form Act Title: The Nile Delta Ambush and the Birth of the Iron Age • **Word Count:** 196 words • **Visual Cuts:** 11 shots (averaging 3.5s per cut) • **Format:** Plays as Act 5 in the Master 16:9 Documentary AND exports as a standalone 9:16 Short.

Cut ID & Type	Spoken Narration (ChristopherNeural +8%)	Era-Locked Fooocus SDXL Prompt (3–4s Cut)
act05_shot01 Medium Troop (push_in)	Pharaoh Ramesses the Third knew his army could never defeat the Sea Peoples on the open Mediterranean Sea.	16:9 cinematic medium close-up of Pharaoh Ramesses III wearing the blue Khepresh war crown and gold jewelry, studying a papyrus map with his generals by torchlight, 8k
act05_shot02 Tactical Map (push_in)	So he set a brilliant, deadly trap inside the narrow mouths of the Nile Delta.	16:9 top-down tactical battle map of the Nile Delta marshlands showing narrow river mouths, Egyptian ambush positions, and approaching enemy fleet
act05_shot03 Wide Establishing (pan_right)	He allowed the enemy fleet to row deep into the shallow, reed-choked river channels.	16:9 wide shot of Sea Peoples wooden war galleys rowing into a narrow muddy Nile channel surrounded by dense tall papyrus reeds, 8k
act05_shot04 Action (push_in)	Then, Egyptian warships blocked the river exit behind them like a giant net.	16:9 dynamic action shot of heavy Egyptian warships with lion-headed prows ramming into the rear of the enemy fleet, cutting off their escape to the sea, 8k
act05_shot05 Medium Troop (pull_out)	Thousands of elite Egyptian archers rose from the muddy banks, raining composite arrows onto the trapped wooden decks.	16:9 cinematic medium shot of rows of Egyptian archers drawing golden composite bows in unison on the riverbank, thousands of arrows flying through the air, 8k
act05_shot06 Action (push_in)	Grappling hooks were thrown from the shore, capsizing the enemy galleys into the water.	16:9 dramatic action shot of Egyptian soldiers hauling thick ropes with iron grappling hooks, pulling a foreign warship onto its side in the river mud, 8k

Cut ID & Type	Spoken Narration (ChristopherNeural +8%)	Era-Locked Fooocus SDXL Prompt (3–4s Cut)
act05_shot07 Primary Source (push_in)	As Ramesses carved on the temple walls: 'Their ships and their goods were as if fallen into the water; their seed is no more.'	16:9 archival stone relief from Medinet Habu showing capsized enemy boats, drowning warriors, and Egyptian victory hieroglyphs highlighted, 8k
act05_shot08 Wide Establishing (pull_out)	Egypt won, but it was a hollow victory. The great world trade network was shattered forever.	16:9 wide shot of smoke rising over the ruined, silent Nile battlefield at sunset, floating wooden wreckage in the muddy water, 8k
act05_shot09 Wide Establishing (push_in)	In Greece, seventy-five percent of the population disappeared, and people completely forgot how to read and write for four hundred years.	16:9 poignant shot of overgrown stone ruins of an ancient Greek palace with a lone shepherd walking past fallen limestone columns at dusk, 8k
act05_shot010 Macro Detail (push_in)	Because the tin trade routes were severed forever, blacksmiths turned to a stubborn metal buried under their own feet: iron.	16:9 macro close-up of an ancient blacksmith striking a glowing red-hot iron sword blade on a stone anvil, white-hot sparks flying in a dark forge, 8k
act05_shot011 Wide Establishing (pull_out)	Out of the ashes of the Bronze Age collapse, the Iron Age was born, giving rise to Greece, Rome, and the modern world.	16:9 majestic panoramic landscape showing an early Iron Age hill citadel rising against a brilliant golden dawn sky, photorealistic 8k
